If you want a [used BMW dealer in London](#) that will cut you a great deal then try Big Motoring World. They have over 500 cheap used BMW in stock all at one single location. I was absolutely blown away as this is by far the biggest selection of this brand I have viewed anywhere. They do have the odd non-franchised car such as Mercedes and Audi, but these are generally rare and immaculate examples they have taken in part exchange when selling one of their BMW cars. They also service BMW and so MOT as well so they are a one stop car shop.
